Kapitola 1

`Open Iconic v1.1.1`

1.0.1 Open Iconic is the open source sibling of `Iconic`. It is a hyper-legible collection of 223 icons with a tiny footprint—ready to use with Bootstrap and Foundation. `View the collection`

1.1 What's in Open Iconic?

- 223 icons designed to be legible down to 8 pixels
- Super-light SVG files - 61.8 for the entire set
- SVG sprite—the modern replacement for icon fonts
- Webfont (EOT, OTF, SVG, TTF, WOFF), PNG and WebP formats
- Webfont stylesheets (including versions for Bootstrap and Foundation) in CSS, LESS, SCSS and Stylus formats
- PNG and WebP raster images in 8px, 16px, 24px, 32px, 48px and 64px.

1.2 Getting Started

1.2.0.1 For code samples and everything else you need to get started with Open Iconic, check out our `Icons` and `Reference` sections.

1.2.1 General Usage

1.2.1.1 Using Open Iconic's SVGs

We like SVGs and we think they're the way to display icons on the web. Since Open Iconic are just basic SVGs, we suggest you display them like you would any other image (don't forget the `alt` attribute).

```

```

1.2.1.2 Using Open Iconic's SVG Sprite

Open Iconic also comes in a SVG sprite which allows you to display all the icons in the set with a single request. It's like an icon font, without being a hack.

Adding an icon from an SVG sprite is a little different than what you're used to, but it's still a piece of cake. *Tip: To make your icons easily style able, we suggest adding a general class to the `<svg>` tag and a unique class name for each different icon in the `<use>` tag.*

```
<svg class="icon">
  <use xlink:href="open-iconic.svg#account-login" class="icon-account-login"></use>
</svg>
```

Sizing icons only needs basic CSS. All the icons are in a square format, so just set the `<svg>` tag with equal width and height dimensions.

```
.icon {
  width: 16px;
  height: 16px;
}
```

Coloring icons is even easier. All you need to do is set the `fill` rule on the `<use>` tag.

```
.icon-account-login {
  fill: #f00;
}
```

To learn more about SVG Sprites, read [Chris Coyier's guide](#).

1.2.1.3 Using Open Iconic's Icon Font...

...with Bootstrap

You can find our Bootstrap stylesheets in `font/css/open-iconic-bootstrap.{css, less, scss, styl}`

```
<link href="/open-iconic/font/css/open-iconic-bootstrap.css" rel="stylesheet">
<span class="oi oi-icon-name" title="icon name" aria-hidden="true"></span>
```

...with Foundation

You can find our Foundation stylesheets in `font/css/open-iconic-foundation.{css, less, scss, styl}`

```
<link href="/open-iconic/font/css/open-iconic-foundation.css" rel="stylesheet">
<span class="fi-icon-name" title="icon name" aria-hidden="true"></span>
```

...on its own

You can find our default stylesheets in `font/css/open-iconic.{css, less, scss, styl}`

```
<link href="/open-iconic/font/css/open-iconic.css" rel="stylesheet">
<span class="oi" data-glyph="icon-name" title="icon name" aria-hidden="true"></span>
```

1.3 License

1.3.1 Icons

All code (including SVG markup) is under the [MIT License](#).

1.3.2 Fonts

All fonts are under the [SIL Licensed](#).

Kapitola 2

Register priestorov mien

2.1 Package List

Tu nájdete zoznam balíkov so stručným popisom (pokiaľ bol uvedený):

Haxee	9
Haxee.Entities	9
Haxee.Entities.DTOs	9
Haxee.Entities.Entities	9
Haxee.Entities.Entities.Mqtt	9

Haxee.Test	11
Haxee.Web	11
Haxee.Web.Controllers	11
Haxee.Web.Pages	11
Haxee.Web.Pages.Admin	11
Haxee.Web.Pages.Auth	11

Kapitola 3

Register hierarchie tried

3.1 Hierarchia tried

Tu nájdete zoznam, vyjadrujúci vzťah dedičnosti tried. Je zoradený približne (ale nie úplne) podľa abecedy:

AbstractEntity	
Haxee.Entities.Entities.Attendee	14
Haxee.Entities.Entities.StandVisit	29
Haxee.Entities.Entities.Year	30
Haxee.Entities.DTOs.AbstractEntity	13
Haxee.Entities.DTOs.Stand	28
Haxee.Entities.Models.AddAccountModel	13
Haxee.Entities.Models.AddPenaltyModel	14
Haxee.Entities.DTOs.AttendeeInformationDTO	15
Haxee.Entities.Models.AttendeeLeaderboardModel	16
Haxee.Entities.Models.AttendeesStatsModel	16
Haxee.Entities.Constants.CascadingParameters	16
Haxee.Entities.Models.ChangeSettingsModel	16
Haxee.Entities.Constants	17
ControllerBase	
Haxee.Web.Controllers.MqttController	24
Haxee.Web.Controllers.PasswordController	25
Haxee.Web.Controllers.SetupController	27
Haxee.Entities.Models.CreateQuizModel	17
Haxee.Entities.Models.CreateStandModel	18
Haxee.Entities.Entities.Mqtt.CurrentYear	18
Haxee.Internal.Data.DataSeeder	19
Haxee.MQTTConsumer.Services.DrawService	19
Haxee.Entities.Constants.Emails	20
Haxee.MQTTConsumer.Services.HelperService	21
Haxee.Test.HelperServiceTest	21
IdentityDbContext	
Haxee.Internal.Data.DataContext	18
IdentityUser	
Haxee.Entities.DTOs.User	30
Haxee.Web.Pages.Admin.InputModel	21
Haxee.Web.Pages.Auth.LoginModel.InputModel	22
Haxee.Internal.Services.MailService	23
Haxee.MQTTConsumer.Services.MenuService	24
Haxee.MQTTConsumer.Services.MqttService	25

PageModel	
Haxee.Web.Pages.Admin.AddAccountsModel	14
Haxee.Web.Pages.Admin.MenuModel	24
Haxee.Web.Pages.Auth.LoginModel	22
Haxee.Web.Pages.Auth.LogoutModel	23
Haxee.Web.Pages.ErrorModel	20
Haxee.Internal.Helpers.PasswordHelper	26
Haxee.Entities.Constants.Paths	26
Haxee.Entities.Constants.Policies	26
Haxee.Web.Program	26
Program	27
Haxee.Internal.Helpers.QuizHelper	27
Haxee.Entities.Constants.Roles	27
Haxee.MQTTConsumer.Services.SetupService	28
Haxee.Entities.Models.StandStatsModel	29

Kapitola 4

Register tried

4.1 Zoznam tried

Nasledujúci zoznam obsahuje predovšetkým identifikáciu tried, ale nachádzajú sa tu i ďalšie netriviálne prvky, ako sú štruktúry (struct), uniony (union) a rozhrania (interface). V zozname sú uvedené ich stručné popisy:

Haxee.Entities.DTOs.AbstractEntity	13
Haxee.Entities.Models.AddAccountModel	13
Haxee.Web.Pages.Admin.AddAccountsModel	14
Haxee.Entities.Models.AddPenaltyModel	14
Haxee.Entities.Entities.Attendee	14
Haxee.Entities.DTOs.AttendeeInformationDTO	
Objekt pre pohyb dát. MQTT Consumer využíva tento objekt na rozparovanie správy od MQTT Brokera a jej následné odoslanie na API	15
Haxee.Entities.Models.AttendeeLeaderboardModel	16
Haxee.Entities.Models.AttendeesStatsModel	16
Haxee.Entities.Constants.CascadingParameters	16
Haxee.Entities.Models.ChangeSettingsModel	16
Haxee.Entities.Constants	17
Haxee.Entities.Models.CreateQuizModel	17
Haxee.Entities.Models.CreateStandModel	18
Haxee.Entities.Entities.Mqtt.CurrentYear	18
Haxee.Internal.Data.DataContext	18
Haxee.Internal.Data.DataSeeder	19
Haxee.MQTTConsumer.Services.DrawService	19
Haxee.Entities.Constants.Emails	20
Haxee.Web.Pages.ErrorModel	20
Haxee.MQTTConsumer.Services.HelperService	21
Haxee.Test.HelperServiceTest	21
Haxee.Web.Pages.Admin.InputModel	21
Haxee.Web.Pages.Auth.LoginModel.InputModel	22
Haxee.Web.Pages.Auth.LoginModel	22
Haxee.Web.Pages.Auth.LogoutModel	23
Haxee.Internal.Services.MailService	23
Haxee.Web.Pages.Admin.MenuModel	24
Haxee.MQTTConsumer.Services.MenuService	24
Haxee.Web.Controllers.MqttController	24
Haxee.MQTTConsumer.Services.MqttService	25
Haxee.Web.Controllers.PasswordController	25
Haxee.Internal.Helpers.PasswordHelper	26

Haxee.Entities.Constants.Paths	26
Haxee.Entities.Constants.Policies	26
Haxee.Web.Program	26
Program	27
Haxee.Internal.Helpers.QuizHelper	27
Haxee.Entities.Constants.Roles	27
Haxee.Web.Controllers.SetupController	27
Haxee.MQTTConsumer.Services.SetupService	28
Haxee.Entities.DTOs.Stand	28
Haxee.Entities.Models.StandStatsModel	29
Haxee.Entities.Entities.StandVisit	29
Haxee.Entities.DTOs.User	30
Haxee.Entities.Entities.Year	30

Kapitola 6

Dokumentácia tried

6.1 Dokumentácia triedy Haxee.Entities.DTOs.AbstractEntity

Diagram dedičnosti pre triedu Haxee.Entities.DTOs.AbstractEntity

Vlastnosti

- `int Id` [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Entities/AbstractEntity.cs

6.2 Dokumentácia triedy Haxee.Entities.Models.AddAccountModel

Vlastnosti

- `required string Name` [get, set]
- `required string Email` [get, set]
- `required string DateOfBirth` [get, set]
- `UserType UserType = UserType.Kid` [get, set]
- `bool SuperInstructor = false` [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/AddAccountModel.cs

6.3 Dokumentácia triedy Haxee.Web.Pages.Admin.AddAccountsModel

Diagram dedičnosti pre triedu Haxee.Web.Pages.Admin.AddAccountsModel

Verejné metódy

- **AddAccountsModel** (userManager< User > userManager)
- void **OnGet** ()
- async Task< IActionResult > **OnPostAsync** ()

Vlastnosti

- **InputModel Input** = new() [get, set]

Privátne atribúty

- readonly userManager< User > **_userManager**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Admin/AddAccounts.cshtml.cs

6.4 Dokumentácia triedy Haxee.Entities.Models.AddPenaltyModel

Vlastnosti

- int **PenaltyInMinutes** [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/AddPenaltyModel.cs

6.5 Dokumentácia triedy Haxee.Entities.Entities.Attendee

Diagram dedičnosti pre triedu Haxee.Entities.Entities.Attendee

Verejné metódy

- TimeSpan? **GetTime** ()

Vlastnosti

- DateTime? **StartedAt** [get, set]
- DateTime? **EndedAt** [get, set]
- required string **UserId** [get, set]
- string? **CardId** [get, set]
- required int **YearId** [get, set]
- virtual Year **Year** = null! [get, set]
- virtual User **User** = null! [get, set]
- virtual List< StandVisit > **StandVisits** = new() [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Entities/Attendee.cs

6.6 Dokumentácia triedy Haxee.Entities.DTOs.AttendeeInformationDTO

Objekt pre pohyb dát. MQTT Consumer využíva tento objekt na rozparovanie správy od MQTT Brokera a jej následné odoslanie na API.

Vlastnosti

- required string **CardId** [get, set]
Idnetifikačné číslo karty.
- required DateTime **DateTime** [get, set]
čas, kedy bola priložená.
- required string **Trigger** [get, set]
Stanovisko, ktoré správu odoslalo.

6.6.1 Detailný popis

Objekt pre pohyb dát. MQTT Consumer využíva tento objekt na rozparovanie správy od MQTT Brokera a jej následné odoslanie na API.

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/DTOs/AttendeeInformationDTO.cs

6.7 Dokumentácia triedy Haxee.Entities.Models.AttendeeLeaderboardModel

Vlastnosti

- string **FullName** = string.Empty [get, set]
- TimeSpan? **Time** [get, set]
- int **VisitedStands** [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/AttendeeLeaderboardModel.cs

6.8 Dokumentácia triedy Haxee.Entities.Models.AttendeesStatsModel

Vlastnosti

- int **Waiting** [get, set]
- int **InProgress** [get, set]
- int **Completed** [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/AttendeesStatsModel.cs

6.9 Dokumentácia triedy Haxee.Entities.Constants.CascadingParameters

Statické verejné atribúty

- const string **CurrentAccount** = "CurrentAccount"

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.10 Dokumentácia triedy Haxee.Entities.Models.ChangeSettingsModel

Vlastnosti

- string **FirstName** = string.Empty [get, set]
- string **LastName** = string.Empty [get, set]
- string **Email** = string.Empty [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/ChangeSettingsModel.cs

6.11 Dokumentácia triedy Haxee.Entities.Constants

Triedy

- class [CascadingParameters](#)
- class [Emails](#)
- class [Paths](#)
- class [Policies](#)
- class [Roles](#)

Statické verejné atribúty

- const string **QA_SEPARATOR** = "---"
- static JsonSerializerOptions [DEFAULT_OPTIONS](#)

6.11.1 Dokumentácia k dátovým členom

6.11.1.1 DEFAULT_OPTIONS

```
JsonSerializerOptions Haxee.Entities.Constants.DEFAULT_OPTIONS [static]
```

Inicializátor:

```
= new JsonSerializerOptions  
{  
    WriteIndented = true  
}
```

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.12 Dokumentácia triedy Haxee.Entities.Models.CreateQuizModel

Vlastnosti

- string **Name** = string.Empty [get, set]
- string **Location** = string.Empty [get, set]
- int **PenaltyInMinutes** = 1 [get, set]
- string **QuestionsAndAnswers** = string.Empty [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/CreateQuizModel.cs

6.13 Dokumentácia triedy Haxee.Entities.Models.CreateStandModel

Vlastnosti

- string **Name** = string.Empty [get, set]
- string **Location** = string.Empty [get, set]
- int **PenaltyInMinutes** = 10 [get, set]
- User? **Supervisor** [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Models/CreateStandModel.cs

6.14 Dokumentácia triedy Haxee.Entities.Entities.Mqtt.CurrentYear

Statické verejné metódy

- static **CurrentYear** **GetInstance** ()
- static async Task< bool > **IsSetUp** ()
- static void **Clear** ()

Vlastnosti

- string **BrokerIP** = string.Empty [get, set]
- int **BrokerPort** [get, set]
- string **ClientName** = "MQTTConsumer" [get, set]
- string **GlobalTopic** = string.Empty [get, set]
- int **Year** [get, set]

Statické privátne atribúty

- static ? **CurrentYear** **_instance** = null

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Entities/Mqtt/CurrentYear.cs

6.15 Dokumentácia triedy Haxee.Internal.Data.DataContext

Diagram dedičnosti pre triedu Haxee.Internal.Data.DataContext

Verejné metódy

- **DataContext** (DbContextOptions dbContextOptions)

Chránené metódy

- override void **OnModelCreating** (ModelBuilder builder)

Vlastnosti

- DbSet< Stand > **Stands** [get, set]
- DbSet< Year > **Years** [get, set]
- DbSet< Attendee > **Attendees** [get, set]
- DbSet< StandVisit > **StandVisits** [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Internal/Data/DataContext.cs

6.16 Dokumentácia triedy Haxee.Internal.Data.DataSeeder

Statické verejné metódy

- static async Task **Seed** (IServiceProvider serviceProvider)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Internal/Data/DataSeeder.cs

6.17 Dokumentácia triedy Haxee.MQTTConsumer.Services.DrawService

Statické verejné metódy

- static void **DrawLogo** ()
- static void **DrawErrorOption** (List< int > validOptions)
- static async Task **ShowCurrentSettings** ()
- static void **DrawMainMenu** ()
- static void **DrawBonk** ()
- static void **DrawErrorMessage** (string text)
- static void **DrawSuccessMessage** (string text)
- static void **DrawInfoMessage** (string text)
- static void **DrawReceivedMessage** (string topic, string message)

Statické privátne metódy

- static void **AddTopicColor** (string topic)

Statické privátne atribúty

- static Dictionary< string, ConsoleColor > **_topicColor** = new Dictionary<string, ConsoleColor>()

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Services/DrawService.cs

6.18 Dokumentácia triedy Haxee.Entities.Constants.Emails**Statické verejné atribúty**

- const string **SUPER_ADMIN** = "superjozef@lstme.sk"
- const string **INSTRUCTOR** = "jozef@lstme.sk"
- const string **KID** = "ucastnik@lstme.sk"
- const string **KID2** = "ucastnik2@lstme.sk"

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.19 Dokumentácia triedy Haxee.Web.Pages.ErrorModel

Diagram dedičnosti pre triedu Haxee.Web.Pages.ErrorModel

**Verejné metódy**

- **ErrorModel** (ILogger< [ErrorModel](#) > logger)
- void **OnGet** ()

Vlastnosti

- string? **RequestId** [get, set]
- bool **ShowRequestId** [get]

Privátne atribúty

- readonly ILogger< [ErrorModel](#) > **_logger**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Error.cshtml.cs

6.20 Dokumentácia triedy Haxee.MQTTConsumer.Services.HelperService

Statické verejné metódy

- static bool **ValidMenuOption** (List< int > validOptions, int option)
- static bool **ValidateYear** (string year)
- static bool **Validatelp** (string a)
- static bool **ValidatePort** (string p)
- static bool **ValidateTopic** (string topic)
- static bool **ValidateCurrentYearSetup** (string year, string topic, string port, string ip)
- static ? YearStatus **GetStatusFromString** (string s)
- static ? AttendeeInformationDTO **ParseMessage** (string message, string topic)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Services/HelperService.cs

6.21 Dokumentácia triedy Haxee.Test.HelperServiceTest

Verejné metódy

- void **ValidatelpValidAddress** ()
- void **ValidatelpInvalidAddress** ()
- void **ValidateYearValidYear** ()
- void **ValidateYearInvalidYear** ()
- void **ValidateMenuOptionValidOption** ()
- void **ValidateMenuOptionInvalidOption** ()
- void **ValidatePortValidOption** ()
- void **ValidatePortInvalidOption** ()
- void **ValidateTopicValidText** ()
- void **ValidateTopicInvalidText** ()
- void **ValidateCurrentYearSetupValid** ()
- void **ValidateCurrentYearSetupInvalid** ()
- void **ValidateMessageValid** ()
- void **ValidateMessageInvalid** ()

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Test/HelperServiceTest.cs

6.22 Dokumentácia triedy Haxee.Web.Pages.Admin.InputModel

Vlastnosti

- string **Json** = string.Empty [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Admin/AddAccounts.cshtml.cs

6.23 Dokumentácia triedy Haxee.Web.Pages.Auth.LoginModel.InputModel

Vlastnosti

- string **Email** = string.Empty [get, set]
- string **Password** = string.Empty [get, set]

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Auth/Login.cshtml.cs

6.24 Dokumentácia triedy Haxee.Web.Pages.Auth.LoginModel

Diagram dedičnosti pre triedu Haxee.Web.Pages.Auth.LoginModel

Triedy

- class [InputModel](#)

Verejné metódy

- **LoginModel** (SignInManager< User > signInManager, IConfiguration configuration)
- IActionResult **OnGet** ()
- async Task< IActionResult > **OnPostAsync** ()

Vlastnosti

- [InputModel](#) **Input** = new() [get, set]
- string **ReturnUrl** = string.Empty [get, set]

Privátne atribúty

- readonly SignInManager< User > **_signInManager**
- readonly IConfiguration **_configuration**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Auth/Login.cshtml.cs

6.25 Dokumentácia triedy Haxee.Web.Pages.Auth.LogoutModel

Diagram dedičnosti pre triedu Haxee.Web.Pages.Auth.LogoutModel

Verejné metódy

- **LogoutModel** (SignInManager< User > signInManager)
- async Task< IActionResult > **OnGetAsync** ()

Privátne atribúty

- readonly SignInManager< User > **_signInManager**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Auth/Logout.cshtml.cs

6.26 Dokumentácia triedy Haxee.Internal.Services.MailService

Verejné metódy

- **MailService** (IEmailService emailService)
- async Task **SendNewPasswordAsync** (string emailAddress, string password)

Privátne metódy

- async Task **SendEmailAsync** (string emailAddress, string subject, string bodyPath, Dictionary< string, string >? data=null)

Privátne atribúty

- readonly IEmailService **_emailService**

Statické privátne atribúty

- static readonly string **BASE_PATH** = Path.Combine(AppDomain.CurrentDomain.BaseDirectory, "wwwroot", "emails")
- static readonly string **NEW_PASSWORD** = Path.Combine(BASE_PATH, "NewPassword.html")

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Internal/Services/MailService.cs

6.27 Dokumentácia triedy Haxee.Web.Pages.Admin.MenuModel

Diagram dedičnosti pre triedu Haxee.Web.Pages.Admin.MenuModel

Verejné metódy

- void **OnGet** ()

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Pages/Admin/Menu.cshtml.cs

6.28 Dokumentácia triedy Haxee.MQTTConsumer.Services.MenuService

Statické verejné metódy

- static int **MainMenu** ()
- static async Task **CurrentSetup** ()
- static void **MQTTMissingInfoScreen** ()
- static async void **HifiSetUp** ()

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Services/MenuService.cs

6.29 Dokumentácia triedy Haxee.Web.Controllers.MqttController

Diagram dedičnosti pre triedu Haxee.Web.Controllers.MqttController

Verejné metódy

- **MqttController** (IDbContextFactory< DbContext > dbContextFactory)
- async Task< IActionResult > **PostAsync** ([FromBody] AttendeeInformationDTO attendeeInformation)

Privátne atribúty

- readonly IDbContextFactory< DataContext > **_dbContextFactory**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Controllers/MqttController.cs

6.30 Dokumentácia triedy Haxee.MQTTConsumer.Services.MqttService

Statické verejné metódy

- static async Task **SetupAndRunMQTT** ()
- static void **OnConnected** (MqttClientConnectedEventArgs obj)
- static void **OnConnectingFailed** (ManagedProcessFailedEventArgs obj)
- static void **OnDisconnected** (MqttClientDisconnectedEventArgs obj)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Services/MqttService.cs

6.31 Dokumentácia triedy Haxee.Web.Controllers.PasswordController

Diagram dedičnosti pre triedu Haxee.Web.Controllers.PasswordController

**Verejné metódy**

- **PasswordController** (userManager< User > userManager, MailService mailService)
- async Task< IActionResult > **PostAsync** ([FromQuery] string id)

Privátne atribúty

- readonly userManager< User > **_userManager**
- readonly MailService **_mailService**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Controllers/PasswordController.cs

6.32 Dokumentácia triedy Haxee.Internal.Helpers.PasswordHelper

Statické verejné metódy

- static string **GeneratePassword** ()

Statické privátne atribúty

- const string **ALPHABET** = "abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ0123456789"
- const int **PASSWORD_LENGTH** = 8

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Internal/Helpers/PasswordHelper.cs

6.33 Dokumentácia triedy Haxee.Entities.Constants.Paths

Statické verejné atribúty

- const string **LOG_IN** = "/auth/login"
- const string **LOG_OUT** = "/auth/logout"

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.34 Dokumentácia triedy Haxee.Entities.Constants.Policies

Statické verejné atribúty

- const string **RequireUser** = "RequireUser"
- const string **RequireAdmin** = "RequireAdmin"

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.35 Dokumentácia triedy Haxee.Web.Program

Statické verejné metódy

- static void **Main** (string[] args)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Program.cs

6.36 Dokumentácia triedy Program

Statické privátne metódy

- static async Task **Main** (string[] args)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Program.cs

6.37 Dokumentácia triedy Haxee.Internal.Helpers.QuizHelper

Statické verejné metódy

- static ? string **GetQuestion** (string questionAndAnswer)
- static ? string **GetAnswer** (string questionAndAnswer)
- static bool **IsAnswerCorrect** (string questionAndAnswer, string providedAnswer)
- static string **GetQuestionAnswerPair** (string question, string answer)

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Internal/Helpers/QuizHelper.cs

6.38 Dokumentácia triedy Haxee.Entities.Constants.Roles

Statické verejné atribúty

- const string **User** = "User"
- const string **Admin** = "Admin"

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Entities/Constants.cs

6.39 Dokumentácia triedy Haxee.Web.Controllers.SetupController

Diagram dedičnosti pre triedu Haxee.Web.Controllers.SetupController

Verejné metódy

- **SetupController** (IDbContextFactory< DbContext > dbContextFactory)
- async Task< IActionResult > **GetAsync** ()
- async Task< IActionResult > **PostAsync** ([FromBody] [CurrentYear](#) currentYear)

Privátne atribúty

- readonly IDbContextFactory< DbContext > **_dbContextFactory**

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.Web/Controllers/SetupController.cs

6.40 Dokumentácia triedy Haxee.MQTTConsumer.Services.SetupService**Statické verejné metódy**

- static async Task **SetupCurrentYear** ()

Dokumentácia pre túto triedu bola generovaná z nasledujúceho súboru:

- Haxee.MQTTConsumer/Services/SetupService.cs

6.41 Dokumentácia triedy Haxee.Entities.DTOs.Stand

Diagram dedičnosti pre triedu Haxee.Entities.DTOs.Stand

**Vlastnosti**

- string? **SupervisorId** [get, set]
- virtual ? [User](#) **Supervisor** [get, set]
- required string **Name** [get, set]
- required string **Location** [get, set]
